The value of shares in the fund and income received from it can go down as well as up, and investors may not get back the full amount invested.

Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations. In emerging markets, the risks can be greater than in developed markets. Funds with investments in derivative instruments entail specific risks that may increase the risk profile of the fund and are more fully described in the fund's prospectus.
