Past performance is not an indicator or a guarantee of future performance. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details are in the fund's base currency, include the reinvested dividends net of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Fund performance data is based on the Rensburg UK Blue Chip Growth Trust's mid price from its launch on 01/01/1990 to 17/10/2011 and the net asset value of the Franklin UK Rising Dividends Fund's A(inc) shares thereafter.

What are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments.

There is no guarantee that the Fund will meet its objective.

The Fund invests mainly in equity securities of UK companies that have paid consistently rising dividends. Such securities have historically been subject to price movements due to company-specific factors and movements in the equity markets of the UK generally. As a result, the performance of the Fund can fluctuate considerably over time.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

Other significant risks include: liquidity risk.

For full details of all of the risks applicable to this Fund, please refer to the "Risk Factors" section of the Fund in the current prospectus of Franklin Templeton Funds.

Glossary

Dividend Yield: The annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio.

Price to Book: The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds.

Price to Cash Flow: Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds.

Price to Earnings (12-mo Trailing): The share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

Important Information

Given the variety of investment options available today, we suggest investors seek guidance from a Financial Adviser.

An index is unmanaged and one cannot invest directly in an index. The performance of the index does not include the deduction of expenses and does not represent the performance of any Franklin Templeton fund.

Source: FTSE. Important data provider notices and terms available at www.franklintempletondatasources.com

The Franklin UK Blue Chip Fund launched on the 17.10.2011 to receive the assets of the Rensburg UK Blue Chip Growth Trust, a unit trust. As at 30 January 2015, Franklin UK Blue Chip Fund was renamed Franklin UK Rising Dividends Fund.

From 30/01/15 the funds charges and expenses are charged to capital instead of income. This has the effect of increasing the distribution(s) for the year and constraining the fund's capital performance. We have provided an estimated yield based on a forecast of the fund's ongoing charges and expenses.

The Fund invests in a specific sector or geographical area and the returns may be more volatile than a more diversified fund.

Fund Overview: The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market unit price of the fund as at the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions.

Fund Management: CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Ratings: © Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Ongoing Charges: The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Performance attribution is calculated in the base currency of the fund.
