All LibertyShares ETFs are sub-funds of the Franklin LibertyShares ICAV, an Irish Collective Asset-managed Vehicle, incorporated under the laws of Ireland.
1. The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Active ETFs:

The Franklin Liberty Euro Short Maturity UCITS ETF invests primarily in short-term investment grade debt securities denominated in Euros while aiming to maintain capital preservation and liquidity. Such securities have historically proven to present some stability over time and have benefitted from limited exposure to interest rates and movements in the bond market. As a result, the performance of the Fund can fluctuate to a small degree over time.

The Franklin Liberty USD Investment Grade Corporate Bond ETF invests primarily in U.S. dollar denominated corporate debt securities issued by U.S. and non-U.S. companies. Such securities have historically been subject to price movements, generally due to interest rates or movements in the bond market. As a result, the performance of the Fund can fluctuate moderately over time. Other significant risks include: counterparty risk, credit risk, derivatives risk, secondary market trading risk.

For full details of all the risks applicable to the funds, please refer to the "Risk Considerations" section of the fund in the current prospectus.
