

FTGF Western Asset US Government Liquidity Fund

A USD DIS (D): IE0034205421
Money Market | Factsheet as of 31 October 2025

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KIID before making any final investment decisions.

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment Overview

To seek to preserve capital and provide a return (income) in line with money market rates. This Fund qualifies as a short-term public debt constant net asset value (CNAV) money market Fund. The Fund mainly invests in money market instruments issued or guaranteed by government entities, denominated in US dollars and issued by US issuers as well as reverse repurchase agreements and US Dollar cash deposits.

Past performance does not predict future returns.

Charges

Maximum Initial Charge	5.00%
Exit Charge	0.00%
Ongoing Charges Figure	0.65%
Performance Fee	—

The charges are the fees the Fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

Other Cash	-1.11

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Constant NAV class ("CNAV"):** The aim is to maintain the price of your shares in the fund at USD 1.00 but this is not guaranteed and the price may rise or fall. Please see the prospectus and relevant supplement for further details and visit <https://www.franklinresources.com/all-sites> to view NAV prices. **Concentrated fund:** The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses. **Credit Rating:** The credit rating of a money market instrument may be downgraded if the issuer is regarded as less likely to meet interest payments, meaning its value would fall and the fund may have to sell it. This could result in a loss to the fund. **Fund counterparties:** The fund may suffer losses if the parties that it trades with cannot meet their financial obligations. **Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries. **Geographical focus:** This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions. **Liquidity:** In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments. **Money Market Instruments:** There is a risk that issuers of money market instruments held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. **Money market interest rates:** The fund's income is based on short-term interest rates which can fluctuate significantly over short periods, which may affect the value of your shares. **Reverse Repurchase Agreements:** The risk of investing in reverse repurchase agreements is that the seller of the securities fails to fulfil its commitment to repurchase the securities from the Fund in accordance with the terms of the agreement which may cause the Fund to incur a loss. Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KIID. **Distribution Yield:** The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the Net Asset Value of the class as at the reported date. It is based on a snapshot of the portfolio on that day. It does not include any subscription charges and investors may be subject to tax on distributions. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Average Credit Quality:** The average credit quality reflects the holdings of the underlying issues, based on the size of each holding and ratings assigned to each based on rating agency assessments of its creditworthiness. **Average Life:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

This fund meets the requirements under Article 6 of the EU Sustainable Finance Disclosure Regulation (SFDR); the fund does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations.

This material is intended to be of general interest only and should not be construed as investment advice. It does not constitute legal or tax advice and it is not an offer for shares or an invitation to apply for shares of the Irish-domiciled Franklin Templeton Global Funds plc (the "Fund" or "FTGF"). For the avoidance of doubt, if you decide to invest, you will be buying units in the Fund and will not be investing directly in the underlying assets of the Fund.

Franklin Templeton ("FT") provides no guarantee or assurance that the Fund's investment objective will be attained. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. **Past performance does not predict future returns.** Currency fluctuations may cause the value of a Fund's investments to diminish or increase.

FT shall not be liable to any user of this document or to any other person or entity for the inaccuracy of information or any errors or omissions in its contents, regardless of the cause of such inaccuracy, error or omission. Any opinions expressed are the author's at publication date and they are subject to change without prior notice. Any research and analysis contained in this material has been procured by FT for its own purposes and is provided to you only incidentally. Data from third party sources may have been used in the preparation of this document and FT has not independently verified, validated or audited such data.

No shares of the Fund may be directly or indirectly offered or sold to residents of the United States of America. Shares of the Fund are not available for public distribution in all jurisdictions and prospective investors, who are not financial professionals, should consult their financial advisor before deciding to invest. The Fund may use financial derivatives or other instruments which may entail specific risks more fully described in the Fund's Documents.

Subscriptions to shares of the Fund should only be made based on the Fund's current Prospectus and, where available, the relevant KIID, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. These documents can be found on our website at www.franklinresources.com/all-sites, obtained, free of charge, from FTGF's registered office at Riverside Two, Sir John Rogerson's Quay, Grand Canal Dock, Dublin 2, Ireland, or can be requested via FT's European Facilities Service which is available at <https://www.eifs.lu/franklintempleton>. The Fund's documents are available in English, French, German, Italian and Spanish.

In addition, a Summary of Investor Rights is available from www.franklintempleton.lu/summary-of-investor-rights. The summary is available in English.

The sub-funds of FTGF are notified for marketing in multiple EU Member States under the UCITS Directive. FTGF can terminate such notifications for any share class and/or sub-fund at any time by using the process contained in Article 93a of the UCITS Directive.

Benchmark(s) FTSE 1-month US Treasury Bill Index. Used for performance comparison, risk management.

The fund is actively managed and may deviate materially from that of the benchmark(s).

Intended retail investor Investors who understand the risks of the Fund and plan to invest for at least 1 year. The Fund may appeal to investors who are looking for income from an investment that seeks to preserve capital, are interested in exposure to developed short-maturity bond markets as part of a diversified portfolio, have a low risk profile and can tolerate small short-term changes in the share price.

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.
