Gross returns are presented before fees and expenses.

Current performance may be higher or lower than the performance shown. The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

*The Current 7-day yield represents net interest income generated by the investments for the past 7 days and assumes that the same income is generated each week over a 365-day period. The 7-day yield more closely reflects current fund earnings than does total returns. The 30-day yield is the average annualized net investment income per share and is subject to change. Yields for other share classes may vary due to differences in sales charge structure and class expenses. The Fund's yields reflect voluntary fee waivers and/or reimbursements, which may be reduced or terminated at any time.

[†]Annualised returns calculated on a 365 day basis.

Total return figures include reinvestment of dividends at month-end. Fund performance data stated is net of all fees and expenses. Current reimbursements and/or fee waivers are voluntary, and may be reduced or terminated at any time. Absent these reimbursements and/or waivers performance would have been lower.

[†]Total Fund Assets (includes D, S, C, P and WA share classes)

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

Portfolio Composition¹

Maturity Distribution²

¹Deposits include overnight cash which contains forward settlement trades as per holdings report.

²Maturity Distribution is a measure of a bond's maturity which takes into consideration the possibility that the issuer may call the bond before its maturity date. Data may not sum to 100% due to rounding.

No External Support: The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per unit or share.

Risk of Loss: Any risk of loss of the principal is to be borne by the investor.

Principal Fluctuation: An investment in money market funds is different from an investment in deposits, with particular reference to the risk that the principal invested in a money market fund is capable of fluctuation.
