

Franklin FTSE Emerging Markets UCITS ETF

Class (Dis) • ISIN IE000GTF7GF4 • A sub-fund of Franklin Templeton ICAV
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin FTSE Emerging Markets UCITS ETF (the “Fund”) investment objective is to provide exposure to large and mid-capitalisation stocks in emerging market countries globally.

Investment Policy

The Fund invests in equities of companies of medium and large capitalisation in emerging markets that are included in the benchmark.

The Index is a broad free float market-capitalisation weighted index which captures large and mid-sized companies from emerging markets globally. The Index is derived from the FTSE Global Equity Index Series, an index which covers 98% of the world’s investable market capitalisation.

The Fund may use sampling techniques where investing directly in the benchmark components proves inefficient or impossible.

Derivatives and techniques The Fund may use derivatives for hedging and efficient portfolio management.

Strategy The investment manager seeks to minimise the difference between the Fund’s performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) FTSE Emerging Index NR. Used for index tracking only.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the Index securities in a similar proportion to their weighting in the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any

day markets are open for business in the United Kingdom (provided that on such day the markets on which substantially all of the Fund’s investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for long-term investment growth
- are interested in exposure to emerging equity markets as part of a diversified portfolio
- have a high risk profile and can tolerate significant short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

emerging markets: Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

equities: Securities that represent partial ownership of a company.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: USD

Treatment of Income: For distribution shares, dividend income is distributed to investors.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests in equities of companies of medium and large capitalisation in emerging markets. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Index Tracking Risk: No financial instrument or set of investment techniques enables the returns of any Index to be reproduced or tracked exactly. Changes in the investments of any Sub-Fund and re-weightings of the relevant Index may give rise to various transaction costs, operating expenses or inefficiencies which may adversely impact a Sub-Fund’s tracking of an Index.

Index License Risk: To utilise an Index, the Fund may need to have a licence agreement signed with the Index Provider. If, at any time in respect of an Index, the licence granted terminates or disputed, impaired or ceases to exist, the Directors may be forced to replace the Index with another Index. Such a substitution or any delay in such a substitution may have an adverse impact on the Sub-Fund.

Passive Investment Risk: An Index Tracking Sub-Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. Because Index Tracking Sub-Funds are not “actively” managed, Market disruptions and regulatory restrictions could have an adverse effect on an Index Tracking Sub-Fund’s ability to adjust its exposure to the required levels.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton ICAV.
