

FTGF Western Asset Short Duration Blue Chip Bond Fund

Class E USD DIS (D) • ISIN IE00B3MJ6Y11

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF Western Asset Short Duration Blue Chip Bond Fund (the "**Fund**") investment objective is to seek to maximise income and growth of capital (total return).

Investment Policy

The Fund mainly invests in high quality investment grade (or comparable) corporate bonds issued by well-established companies considered to be blue-chip (long-term debt rating of A- or higher by S&P). The Fund will attempt to hedge almost all non-USD exposure to USD. These investments are from developed markets only.

The Fund maintains an average duration below 5 years at the portfolio level (meaning it is less sensitive to interest rate changes than longer duration bond Funds). The Fund will invest only in corporate bonds that in the opinion of the investment manager, are ranked at least senior unsecured corporate debt securities of the relevant issuer.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 years. The Fund may appeal to investors who:

- are looking for a combination of income and investment growth
- are interested in exposure to developed bond markets as part of a diversified portfolio
- have a medium risk profile and can tolerate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

bonds, investment grade: Bonds represent an obligation to repay a debt, along with interest. Investment grade bonds are considered to have a lower risk of becoming unable to make promised payments to investors, including the initial debt.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Share Class Currency: USD

Treatment of Income: For this share class all, or some portion of, net income is declared daily and paid monthly to shareholders.

Risk and Reward Profile

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The Fund invests mainly in higher rated bonds from various countries which. As a result, the performance of the Fund can fluctuate moderately over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
