

## Franklin Global Fundamental Strategies Fund

**Class A (Ydis) EUR • ISIN LU0343523998** • A sub-fund of Franklin Templeton Investment Funds  
The management company is Franklin Templeton International Services S.à r.l.

### Objectives and Investment Policy

Franklin Global Fundamental Strategies Fund (the “**Fund**”) investment objective is to seek long-term investment growth through growth of capital and, as a secondary objective, income.

#### Investment Policy

The Fund mainly invests in equities of any market capitalisation (approximately 60% of assets) and corporate and government bonds (approximately 40%). These investments may be from anywhere in the world, including Mainland China and other emerging markets, and some of the bond investments may be below investment grade.

To a lesser extent, the Fund may invest in convertible securities, including convertible bonds, and asset- and mortgage-backed securities.

**Derivatives and techniques** The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income.

**Strategy** The investment manager flexibly allocates investments across asset classes based on market conditions. In equities, the investment manager focuses on companies that are leaders in innovation, have superior management and are well positioned towards new global market trends.

**SFDR category** Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

**Base currency** US dollar (USD).

**Benchmark(s)** None.

The Fund is actively managed without reference to a benchmark.

#### Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

#### Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 5 years. The Fund may appeal to investors who:

- are looking for a combination of income and investment growth
- are interested in exposure to a mixed asset allocation globally as part of a diversified portfolio
- have a medium to high risk profile and can tolerate significant short-term changes in the share price

**Product availability** The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

#### Terms to Understand

**bonds, below investment grade:** Bonds represent an obligation to repay a debt, along with interest. Below investment grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

**derivatives:** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

**emerging markets:** Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

**Share Class Currency:** EUR

**Treatment of Income:** For the distribution share class shown in this document, dividend income is distributed to shareholders.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund invests mainly in equity and debt securities of companies around the world, including emerging markets. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

#### Risks materially relevant not adequately captured by the indicator:

**Chinese Market risk:** In addition to typical risks linked to Emerging Markets, investments in China are subject to economic, political, tax and operational risks specific to the Chinese Market. Please also refer to the prospectus for China QFII risk, Bond Connect risk and Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk.

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

**Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

**Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

**Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
