

FTGF ClearBridge Global Infrastructure Income Fund

Class PR GBP ACC • ISIN IE000PYZZVC2

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF ClearBridge Global Infrastructure Income Fund (the "Fund") investment objective is to seek long-term investment growth, through a combination of income and growth of capital (total return).

Investment Policy

The Fund mainly invests in equities of companies in infrastructure sectors in developed markets, such as utilities, transport, community and social infrastructure, and communications.

To a lesser extent, the fund may invest in equity and equity-related securities in emerging markets. The fund may also have limited exposure to infrastructure-related real estate funds.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

Strategy In a bottom-up process, the investment manager uses Fundamental analysis to select a concentrated portfolio of companies that appear to have a long life span, offer predictable cash flows, have low earnings volatility and benefit from limited competition due to high barriers to entry. It also favours companies that tend to be better protected from inflation.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

Risk and Reward Profile

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund invests mainly in shares of infrastructure companies from various countries and sectors. As a result, the performance of the Fund can fluctuate considerably over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not

spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund. For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
