

Franklin MSCI Emerging Markets Paris Aligned Climate UCITS ETF

Class SINGLECLASS • ISIN IE000QLV3SY5 • A sub-fund of Franklin Templeton ICAV

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin MSCI Emerging Markets Paris Aligned Climate UCITS ETF (the "**Fund**") investment objective is to provide exposure to large and mid-capitalisation stocks in emerging market countries which are aligned to the transition to a low carbon economy.

Investment Policy

The Fund invests in equities of medium and large market capitalization companies (in emerging market countries) that transition to a lower carbon economy or are less exposed to climate transition risks. These investments are included in the benchmark.

The benchmark is based on the MSCI Emerging Markets Index, its parent index, and includes large and mid-capitalisation securities across 27 emerging market countries and is constructed to follow the EU Paris-aligned Benchmark (EU PAB) Regulations (Regulation (EU) 2019/2089) (the "PAB Regulations").

The benchmark aims to overweight companies which are exposed to climate transition opportunities and underweight those companies which are exposed to climate transition risks. The Index seeks to reduce exposure to high carbon emitters.

Derivatives and techniques The Fund may use derivatives for hedging and efficient portfolio management.

Strategy The investment manager seeks to minimise the difference between the Fund's performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

The Index follows the PAB Regulations which are designed to help investors shift towards a low-carbon economy and align investments to the Paris Climate Agreement. The Index tracks the performance of eligible equity securities, selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario and to meet several other climate-themed objectives. The Index also applies exclusions based on companies' involvement in specific business activities.

For more information see www.franklintempleton.ie/33309

Base currency US dollar (USD).

Benchmark(s) MSCI Emerging Markets Climate Paris Aligned Net Total Return Index. Used for index tracking only.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the benchmark securities in a similar proportion to their

weighting in the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day the London Stock Exchange is open for business (provided that on such day the markets on which substantially all of the Fund's investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for long-term investment growth
- are interested in large and mid-capitalisation stocks (in emerging market countries) which are aligned to the transition to a low carbon economy as part of a diversified portfolio
- have a high risk profile and can tolerate significant short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

emerging markets: Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

equities: Securities that represent partial ownership of a company.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: USD

Treatment of Income: For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund intends to track the performance of the Index which is comprised of large and mid-capitalisation equity securities in emerging market countries selected from the Parent Index. Such assets have historically been subject to price movements due to such factors as general stock market volatility, changes in the financial outlook or fluctuations in currency

markets. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Concentration risk: the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Index related risk: the risk that quantitative techniques used in creating the Index the Fund seeks to track do not generate the intended result, or that the portfolio of the Fund deviates from its Index composition or performance.

Secondary market trading risk: the risk that the shares purchased on the secondary market cannot usually be sold directly back to the Fund and that investors may therefore pay more than the NAV per share when buying shares or may receive less than the current NAV per Share when selling shares.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton ICAV.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not applicable*
Exit charge	Not applicable*

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over a year

Ongoing charges	0.18%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

*No entry nor exit charges are payable where investors deal in shares in the secondary market – i.e. where shares are purchased and sold on a stock exchange. In such cases, investors may pay fees charged by their broker. Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 3% and an exit charge up to a maximum of 2%.

The entry and exit charges shown are maximum amounts; you may pay less in some cases. For more information please ask your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2024. This figure may vary from year to year.

For detailed information about charges, please refer to the “Fees and Expenses” section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.

Past Performance

- The Fund was launched in 2023 and the present share class on 03/09/2023.
