

Franklin US Dividend Tilt UCITS ETF

Class (Dis) • ISIN IE000Z4OBQK4 • A sub-fund of Franklin Templeton ICAV
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin US Dividend Tilt UCITS ETF (the “**Fund**”) investment objective is to provide exposure to large and mid-capitalisation stocks in the US and to maximise income.

Investment Policy

The Fund invests in equities of companies of medium and large capitalisation in the US that are included in the benchmark.

The Index is designed to deliver a portfolio of stocks with a higher dividend yield than its parent benchmark, the Morningstar US Target Market Exposure Index-NR (the “Parent Index”). The Index is made up of large and mid capitalisation securities incorporated in the US and is derived from the Parent Index, which represents the top 85% of the investible equity market of the US.

Derivatives and techniques The Fund may use derivatives for hedging and efficient portfolio management.

Strategy The investment manager seeks to minimise the difference between the Fund's performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) Morningstar US Dividend Enhanced Select Index-NR.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the index securities in a similar proportion to their weighting in the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected

financial institutions, may buy or sell shares directly with the fund, on any day markets are open for business in the United Kingdom (provided that on such day the markets on which substantially all of the Fund's investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for a combination of income and investment growth
- are interested in exposure to US equity markets as part of a diversified portfolio
- have a high risk profile and can tolerate significant short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

equities: Securities that represent partial ownership of a company.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: USD

Treatment of Income: For distribution shares, dividend income is distributed to investors.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund intends to track the performance of large and mid-capitalisation stocks in the US. Such assets have historically been subject to price movements due to such factors as general stock market volatility, changes in the financial outlook or fluctuations in currency markets. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Index Tracking Risk: No financial instrument or set of investment techniques enables the returns of any Index to be reproduced or tracked exactly. Changes in the investments of any Sub-Fund and re-weightings of the relevant Index may give rise to various transaction costs, operating expenses or inefficiencies which may adversely impact a Sub-Fund's tracking of an Index.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Index License Risk: To utilise an Index, the Fund may need to have a licence agreement signed with the Index Provider. If, at any time in respect of an Index, the licence granted terminates or disputed, impaired or ceases to exist, the Directors may be forced to replace the Index with another Index. Such a substitution or any delay in such a substitution may have an adverse impact on the Sub-Fund.

Passive Investment Risk: An Index Tracking Sub-Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. Because Index Tracking Sub-Funds are not “actively” managed, Market disruptions and regulatory restrictions could have an adverse effect on an Index Tracking Sub-Fund's ability to adjust its exposure to the required levels.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Index related risk: the risk that quantitative techniques used in creating the Index the Fund seeks to track do not generate the intended result, or that the portfolio of the Fund deviates from its Index composition or performance.

Single Country/Region Risk: This fund invests primarily in US, which means that it is more sensitive to local economic, market, political or regulatory events in US, and will be more affected by these events than other funds that invest in a broader range of regions.

Equity risk: Prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not applicable*
Exit charge	Not applicable*

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over a year

Ongoing charges	0.12%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

*No entry nor exit charges are payable where investors deal in shares in the secondary market – i.e. where shares are purchased and sold on a stock exchange. In such cases, investors may pay fees charged by their broker. Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 3% and an exit charge up to a maximum of 2%.

The entry and exit charges shown are maximum amounts: you may pay less in some cases. For more information please ask your financial adviser.

The ongoing charges shown here are an estimate of the charges. We have used estimated figures as under current applicable rules we are not allowed to calculate ongoing charges for share classes with less than 12 months of data. The Franklin Templeton ICAV annual report for each financial year will include detail on the exact charges made.

For detailed information about charges, please refer to the “Fees and Expenses” section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.

Past Performance

- The Fund was launched in 2025.
