

Franklin Euro IG Corporate UCITS ETF

Class SINGLECLASS • ISIN IE000H0TSO96 • A sub-fund of Franklin Templeton ICAV
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Euro IG Corporate UCITS ETF (the “Fund”) investment objective is to provide income from the European corporate bond market while seeking to preserve capital.

Investment Policy

The Fund invests primarily in Euro-denominated investment grade corporate debt securities. The Fund will invest a minimum of 80% of assets in fixed and floating rate investment grade corporate debt securities. Such debt securities may be of any maturity or duration.

Corporate issuers may include corporate or other business entities in which a sovereign or government agency may have a direct or indirect interest, including an ownership interest.

To a lesser extent, the Fund may invest in government bonds, convertible securities, including contingent convertible bonds, and asset- and mortgage-backed securities.

Derivatives and techniques The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Strategy The investment manager uses macroeconomic, market and Fundamental analysis to identify securities that appear to offer high real yields for their risk level.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

The investment manager applies a proprietary rating methodology using various ESG criteria to assess long-term opportunities and risks. The Fund avoids issuers lagging in the transition to a low-carbon economy and excludes or restricts investments in certain industries that are harmful to the environment or society, such as exploration and production of fossil fuels, weapons and tobacco. The Fund also makes sustainable investments by investing in green (bonds whose proceeds finance environmentally projects) and other sustainable bonds.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day the London Stock Exchange is open for business (provided that on such day the markets on which substantially all of the Fund’s investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for income from an investment that seeks to preserve capital
- are interested in exposure to European corporate bond markets as part of a diversified portfolio
- have a low to medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

bonds, investment grade: Bonds represent an obligation to repay a debt, along with interest. Investment grade bonds are considered to have a lower risk of becoming unable to make promised payments to investors, including the initial debt.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: EUR

Treatment of Income: For distribution shares, dividend income is distributed to investors.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in debt securities issued by any government or corporation worldwide. Such securities have historically been subject to

price movements, generally due to interest rates or movements in the bond market. As a result, the performance of the Fund can fluctuate moderately over time.

Risks materially relevant not adequately captured by the indicator:

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Sustainability risk: The fund’s integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund’s investments and negatively affect the returns of the fund.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton ICAV.
