

FTGF ClearBridge Infrastructure Value Fund

PR GBP DIS (Q) • ISIN IE00BDBBQ150

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF ClearBridge Infrastructure Value Fund (the "Fund") investment objective is to seek long-term and stable investment growth, through a combination of income and growth of capital (total return), from a portfolio of global infrastructure securities.

Investment Policy

The Fund mainly invests in equity and equity related securities of companies in infrastructure sectors, such as utilities, transport, community and social infrastructure, and communications. These investments may be from anywhere in the world, including China and other emerging markets.

These investments may include depositary receipts. To a lesser extent, the Fund may invest in infrastructure-related real estate Funds.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth (in accordance with the risk profile of the Fund).

Strategy The investment manager uses Fundamental analysis to select long-term investments in a concentrated portfolio of companies that appear to offer predictable cash flows and low earnings volatility and benefit from limited competition due to high barriers to entry. It also favours companies that tend to be better protected from inflation.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

emerging markets: Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

equities Securities that represent partial ownership of a company.

Share Class Currency: GBP

Treatment of Income: For this share class all, or some portion of, net income is declared and paid quarterly to shareholders.

Risk and Reward Profile

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The Fund invests mainly in shares of infrastructure companies from various countries and sectors. As a result, the performance of the Fund can fluctuate considerably over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Hedging: The fund may use derivatives to reduce the risk of movements in exchange rates between the currency of the investments held by the fund and base currency of the fund itself (hedging). However, hedging transactions can also expose the fund to additional risks, such as the risk that the counterparty to the transaction may not be able to make its payments, which may result in loss to the fund.

Investment in China: The fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
