Franklin Global Convertible Securities Fund

Class W (acc) GBP-H1 • ISIN LU3413974489 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Convertible Securities Fund (the “**Fund**”) investment objective is to seek to maximise income and growth of capital (total return).

Investment Policy

The Fund mainly invests in convertible securities from anywhere in the world. Some of these investments may be below investment grade or unrated securities.

These investments may include securities that are in default. To a lesser extent, the Fund may invest in equities and bonds.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) FTSE Global Focus Convertible Index. Used for performance comparison only.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 years. The Fund may appeal to investors who:

- are looking for a combination of income and investment growth
- are interested in exposure to global convertible bond markets as part of a diversified portfolio
- have a medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

convertible securities, below investment grade: Bonds that offer the option or the obligation of receiving repayment of principal either in cash or shares. Below investment grade convertible bonds generally pay higher interest rates but are considered less likely to make all scheduled payments.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Share Class Currency: GBP

Treatment of Income: The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in convertible securities (including low-rated, non-investment grade securities, and possibly securities in default) of corporate

issuers worldwide. Such securities have historically been subject to price movements, due to movement in the prices of underlying equities or movements in interest rates and the bond market generally. As a result, the performance of the Fund can fluctuate over time.

Risks materially relevant not adequately captured by the indicator:

Convertible securities risk: the risk associated with the fact the Fund may invest in convertible securities, which may be low-rated and which may act like either a bond (when the underlying equity value is well below par value for the security) or a stock (when the underlying equity value approaches or exceeds par value).

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
