Class A USD ACC • ISIN IE00B19Z4V13

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF Western Asset US High Yield Fund (the "**Fund**") investment objective is to seek to generate high levels of income.

Investment Policy

The Fund mainly invests in below investment grade (high yield) US corporate and government debt securities denominated in USD.

These investments may include convertible securities, including contingent convertible bonds, and asset- and mortgage-backed securities. To a lesser extent, the Fund may invest in bonds in other developed or emerging markets and bonds rated investment grade (or comparable).

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

Base currency US dollar (USD).

Benchmark(s) Bloomberg US Corporate High Yield, 2% Issuer Cap Index. Used for performance comparison, risk management, carbon footprint comparison and limited portfolio composition constraints.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 5 year. The Fund may appeal to investors who:

- are looking for a product which provides a high level of current income
- are interested in exposure to high yield US debt securities as part of a diversified portfolio
- have a medium to high risk profile and can tolerate significant short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

asset- and mortgage- backed securities: Bonds backed by consumer debt (such as mortgages, credit card and other loan-type debt) and whose income derives from the payments received from the underlying borrowers.

bonds, below investment grade: Bonds represent an obligation to repay a debt, along with interest. Below investment grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

convertible securities, contingent convertible bonds: Bonds that convert into shares of a company upon a pre-determined event occurring. Contingent convertible bonds generally pay higher interest payments compared to other bonds due to the higher risk.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Share Class Currency: USD

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The Fund invests mainly in US higher yielding, lower rated bonds. As a result, the performance of the Fund can fluctuate over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses

for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
