

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FTGF Brandywine Global Income Optimiser Fund

Class A USD DIS (M) PLUS (e) • ISIN IE00B9KHJ624

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF Brandywine Global Income Optimiser Fund (the "Fund") investment objective is to seek to maximise income in all market conditions, while maintaining some degree of capital preservation.

Investment Policy

The Fund mainly invests, directly or indirectly through derivatives, in corporate and government bonds denominated in, or hedged to, USD. These investments may be from anywhere in the world and some of them may be below investment grade. Bonds may include asset- and mortgagebacked securities.

These investments may include convertible securities, including contingent convertible bonds. The Fund may also have exposure to equity-related

Derivatives and techniques The Fund may extensively use derivatives for reducing risks (hedging) and costs, and to generate additional income or

Strategy In a top-down and bottom-up process, the investment manager uses macroeconomic, market and Fundamental analysis to identify securities that appear to offer high real yields for their risk level. The investment manager may take both long and short positions on individual securities and currencies, buying those it appears will increase in price and taking short positions on those it appears will decline in price.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

The investment manager applies a proprietary rating methodology using various ESG criteria to asses long-term opportunities and risks. The Fund removes the lowest rated issuers from the investment universe and excludes or restricts investments in certain industries that are harmful to the environment or society, such as thermal coal, weapons and tobacco.

For more information see www.franklintempleton.ie/91037

Base currency US dollar (USD).

Benchmark(s) Bloomberg Multiverse Index USD Hedged. Used for performance comparison only.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 5 years. The Fund may appeal to investors who:

- are looking for income from an investment that seeks to preserve capital
- are interested in exposure to global bond markets as part of a diversified
- · have a medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through all distribution channels, with or without the need for advice.

Share Class Policy:

For this share class certain fees and expenses may be charged to capital rather than income. This will result in an increase in income available for distribution by foregoing some of the capital that the share class would have available for future investment and potential growth. In addition, all or some portion, of realised and unrealised capital gains net of realised and unrealised capital losses may be declared as a dividend.

Terms to Understand

asset- and mortgage- backed securities: Bonds backed by consumer debt (such as mortgages, credit card and other loan-type debt) and whose income derives from the payments received from the underlying borrowers.

bonds, below investment grade: Bonds represent an obligation to repay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

convertible securities, contingent convertible bonds: Bonds that convert into shares of a company upon a pre-determined event occurring. Contingent convertible bonds generally pay higher interest payments compared to other bonds due to the higher risk.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid monthly to shareholders.

Risk and Reward Profile

Lower risk Potentially lower rewards

Higher risk Potentially higher rewards

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The Fund invests mainly in a diversified portfolio of bonds from various countries and sectors, along with exposure to various currencies. As a result, the performance of the Fund can fluctuate over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Asset-backed securities: The timing and size of the cash-flow from assetbacked securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly. **Bonds:** There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses

for the fund. Bond values are affected by the market's view of the above

risk, and by changes in interest rates and inflation.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Emerging markets investment: The fund may invest in the markets of

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, neople or systems or those of third

rund operations: I he fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments. investments

Low rated bonds: The fund may invest in lower rated or unrated bonds of Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds. Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Charges from capital: Fees and expenses of this share class may be charged to the capital of the share class rather than its income. This policy will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

FTGF Brandywine Global Income Optimiser Fund

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
