The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FTF ClearBridge UK Equity Income Fund

Class W (acc) • ISIN GB00B7DRD638 • A sub-fund of Franklin Templeton Funds

The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD".

For the purposes of the UK Sustainability Disclosure Requirements ("UK SDR"), a sustainable investment label helps investors find funds that have a specific sustainability objective. This Fund does not have a UK sustainable investment label because it does not have a specific sustainability objective.

Objectives and Investment Policy

FTF ClearBridge UK Equity Income Fund (the "Fund") aims to generate an income that is higher than that of the FTSE All-Share Index and increase in value through investment growth, over periods of five years, after all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Core investment

The Fund invests at least two thirds (but typically significantly more) in the shares of companies listed on the London Stock Exchange. These companies are incorporated/domiciled in the UK or which have significant business operations in the UK.

Other investments

The Fund may also invest in:

- Debt securities or bonds (debt obligations that pay interest) issued by governments, government-related, supranational organisations or corporations;
- Convertible bonds (a type of corporate bond which can be exchanged for shares in the same organisation);
- Other types of transferable securities;
- Cash and cash equivalents;
- Money market instruments; and
- Other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies).

Geographic locations (where we invest)

The Fund focuses on investment in the UK although the Investment Manager has discretion to invest in any other country to a lesser extent.

How we select investments (investment strategy)

This Fund is actively managed, which means that the Investment Manager does not copy a benchmark when selecting investments for the Fund.

Typically, the number of holdings in the Fund will vary between 40 to 60 company shares and most of these will be the shares of large (such as those making up the FTSE 100 Index) companies.

The Investment Manager does not intend to invest in every company in the FTSE All-Share Index and have the freedom to invest up to 10% of the Fund's assets outside of it.

Any proportion of the Fund can be invested into specific industry sectors, but the Investment Manager seeks to avoid any unintentional emphasis on a sector in a way that could increase the level of risk.

The Investment Manager tries to further reduce risk by making sure no single company share dominates the Fund's investments. Normally, the Investment Manager tries to keep shareholdings in any individual large company to no more than 5% of the Fund's total value, while a shareholding in any individual medium- and small-sized company would typically be no more than 2%.

ESG (environmental, social, and governance) factors

In selecting the Fund's investments, the Investment Manager assesses prospective investments against various ESG factors. These ESG factors are used to inform the Investment Manager's wider assessment of the value and financial attractiveness of each potential investment and exposures are adjusted accordingly. The Investment Manager may exclude investments depending on their assessment of ESG factors. In addition, the Investment Manager applies automatic exclusions for investments in certain sectors. For more detailed information about how the Investment Manager considers ESG, and a list of exclusions, please see the Fund's 'UK SDR: Consumer Facing Disclosures' available at www.franklintempleton.co.uk/CFD_15846 and the investment objective and policy in the prospectus, available at www.franklintempleton.co.uk/ftfdocuments in the "Additional Documents" tab.

Additional information:

You may request the sale of your shares in the Fund on any UK business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Terms to Understand

Transferable securities: investments such as shares or debt that can be bought and sold between investors.

Collective investment schemes: other investment funds, like the Fund.

Shares of companies (equities): securities that represent an ownership stake in a company.

The income received from the Fund's investments is accumulated and included in the value of the shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities listed on the London Stock Exchange, but may to a lesser extent also invest in debt securities or convertible securities of UK issuers. Such securities have historically been subject to price movements due to company-specific factors and

movements in the equity and fixed income markets of the UK generally. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Charges from capital: the fund's fees and expenses may be taken from its capital (rather than income). This will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

Concentration risk: the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

Single Country/Region Risk: This fund invests primarily in UK, which means that it is more sensitive to local economic, market, political or regulatory events in UK, and will be more affected by these events than other funds that invest in a broader range of regions.

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Charges

One-off charges taken before or after you invest

Entry charge	Not applicable
Exit charge	Not applicable

This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).

Charges taken from the Fund over a year

Ongoing charges	0.52%
------------------------	-------

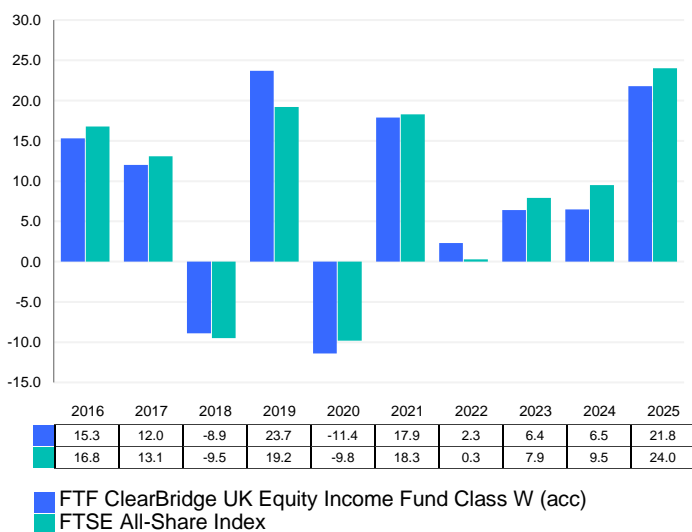

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

The ongoing charges figure is based on the expenses for the Fund for the year to December 2025 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds and the Fund's annual report for details on the exact charges made.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched in 2011 and the present share class on 31/05/2012.
- We measure performance against the Fund's performance target, the FTSE All-Share Index, as it is widely available and reflects investments in the UK stock market.
