

Franklin S&P 500 Financials UCITS ETF

Class SINGLCLASS • ISIN IE000KG7KX17 • A sub-fund of Franklin Templeton ICAV
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin S&P 500 Financials UCITS ETF (the “Fund”) investment objective is to provide exposure to large capitalisation stocks in the US within the financials sector in the United States.

Investment Policy

The Fund invests in equities of companies of large capitalisation in the US that are included in the benchmark.

The benchmark is a free float market-capitalisation weighted index which tracks US companies within the Financials sector. The S&P 500 Capped 35/20 Financials Sector Index-NR (the “Index”) is derived from the S&P 500 index which includes approximately 500 of the largest companies on the US stock market. The Fund may concentrate its investments in a particular industry or group of industries where the Index is similarly concentrated.

Derivatives and techniques The Fund may use derivatives for hedging and efficient portfolio management.

Strategy The investment manager seeks to minimise the difference between the Fund’s performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) S&P 500 Capped 35/20 Financials Sector Index-NR.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the index securities in a similar proportion to their weighting in the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day markets are open for business in the United Kingdom (provided that on such day the markets on which substantially all of the Fund’s investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for long-term investment growth
- are interested in exposure to developed equity markets as part of a diversified portfolio
- have a high risk profile and can tolerate significant short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

equities: Securities that represent partial ownership of a company.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: USD

Treatment of Income: For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund may concentrate its investments in a particular industry or group of industries where the Index is similarly concentrated. As a result, the performance of The Fund can fluctuate significantly over relatively short

time periods. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

Index related risk: the risk that quantitative techniques used in creating the Index the Fund seeks to track do not generate the intended result, or that the portfolio of the Fund deviates from its Index composition or performance.

Index Tracking Risk: No financial instrument or set of investment techniques enables the returns of any Index to be reproduced or tracked exactly. Changes in the investments of any Sub-Fund and re-weightings of the relevant Index may give rise to various transaction costs, operating expenses or inefficiencies which may adversely impact a Sub-Fund’s tracking of an Index.

Passive Investment Risk: An Index Tracking Sub-Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. Because Index Tracking Sub-Funds are not “actively” managed, Market disruptions and regulatory restrictions could have an adverse effect on an Index Tracking Sub-Fund’s ability to adjust its exposure to the required levels.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton ICAV.
