

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Franklin Brazil Opportunities Fund

**Class A (acc) EUR-H1 • ISIN LU0800341645** • A sub-fund of Franklin Templeton Investment Funds  
The management company is Franklin Templeton International Services S.à r.l.

### Objectives and Investment Policy

Franklin Brazil Opportunities Fund (the "Fund") aims to earn income and to increase the value of its investments over the medium to long term by investing across the entire range of available investment opportunities linked to Brazil, targeting an average level of annual distribution of 7%. There is no guarantee that the Fund will achieve its objective.

The Fund invests mainly in:

- debt securities of any quality (including lower quality debt such as non-investment grade securities), equity and equity-related securities issued by companies of any size located in, doing significant business in, or linked to Brazil
- debt securities issued or guaranteed by the Brazilian government and its agencies (up to 100% of the Fund's assets)
- cash when the investment team believes that cash represents a better relative value compared to Brazilian assets

To gain exposure to Brazil, the Fund might invest in securities issued by non-Brazil issuers. The proportion of the Fund's assets allocated to equity or debt securities may vary significantly over time depending on the investment manager's view of the relative attractiveness of each asset class and may result in a predominant exposure either to equity or to debt securities.

The Fund can invest to a lesser extent in:

- short-term debt securities and money market securities
- structured products

The Fund can use derivatives for hedging, efficient portfolio management and/or investment purposes.

The investment team uses in-depth analysis to drive the security selection process as well as the asset allocation and positioning within equity, interest rate, currency and inflation-linked securities markets. The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the Blended 90% JP Morgan EMBI Brazil Plus Index + 10% MSCI Brazil Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

### Terms to Understand

**Structured products:** Packaged financial products whose value is generally linked to underlying asset(s) that are typically created to satisfy a need that cannot be met by investing solely in standard financial instruments available in the market.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund is an asset allocation fund that invests mainly in equity and equity-related securities issued by companies located in, doing significant business in, or otherwise linked to Brazil as well as Brazilian debt securities of any quality, including non-investment grade. Such securities have historically been subject to price movements, generally due to either company-specific or market-related factors and, for the debt securities, movements in interest rates and the local bond market generally. As a result, the performance of the Fund can fluctuate over time.

#### Risks materially relevant not adequately captured by the indicator:

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

**Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

**Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Derivatives risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

**Substantial Leverage risk:** the risk that the permitted use of a substantial degree of leverage may cause a Fund to liquidate portfolio positions to satisfy its obligations when it may not be advantageous to do so. As a result, a relatively small price movement in a derivative contract, may result in substantial losses to a Fund.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	5.75%
<b>Exit charge</b>	Not applicable
<i>This is the maximum that might be taken out of your money before it is invested.</i>	

### Charges taken from the Fund over a year

<b>Ongoing charges</b>	1.91%
------------------------	-------

### Charges taken from the Fund under certain specific conditions

<b>Performance fee</b>	Not applicable
------------------------	----------------

The entry charges shown are maximum amounts; you may pay less in some cases. For more information, please see your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2017. This figure may vary from year to year.

For detailed information about charges, please refer to the sections "Share Classes" and/or "Performance Fees" (as applicable) as well as Appendix E of the current prospectus of Franklin Templeton Investment Funds.
