Franklin UK Mid Cap Fund

Class W (inc) • ISIN GB00B8K8HH50 • A sub-fund of Franklin Templeton Funds
The management company is Franklin Templeton Fund Management Limited

Objectives and Investment Policy

Franklin UK Mid Cap Fund (the "Fund") aims to increase the value of its investments by more than the return of the FTSE 250 ex-Investment Trusts Index (excluding investment companies) over the medium to long term (meaning 3-5 years).

The Fund invests mainly in:

- equity securities of companies that are included in the FTSE 250 Index (excluding investment companies)

The investment team uses detailed company research and extensive UK equity investment experience to build a concentrated portfolio of medium sized UK companies. They look to invest in a relatively small number of companies that over the medium to long term, offer strong and sustainable growth potential, are financially sound and attractively-priced.

You may request the sale of your shares on any UK business day.

For the income share class shown in this document, dividend income is distributed to investors.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Equity securities: Securities that represent an ownership stake in a company.

FTSE 250 Index (excluding investment companies): This index comprises medium sized companies, excluding investment companies, listed on the London Stock Exchange. The Index is used to assess the change in value of the securities which comprise it.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data

based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.
