

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Franklin UK Corporate Bond Fund

**Class W (acc) • ISIN GB00BYZCTS97** • A sub-fund of Franklin Templeton Funds  
The management company is Franklin Templeton Fund Management Limited

### Objectives and Investment Policy

Franklin UK Corporate Bond Fund (the "Fund") aims to achieve a combination of income and capital growth over the medium to long term.

The Fund invests mainly in:

- investment-grade debt securities of UK companies

The Fund invests to a lesser extent in:

- other types of corporate or non-corporate securities
- derivatives for hedging and investment purposes that are used as an active investment management instrument to gain exposure to markets

UK companies are those which are listed, quoted or traded in the UK or that are listed, quoted or traded elsewhere but are incorporated, domiciled or conduct a significant portion of their business in the UK.

You may request the sale of your shares on any UK business day.

The income received from the Fund's investments is accumulated and included

in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

#### Terms to Understand

**Debt securities:** Securities representing the issuer's obligation to repay a loan at a specified date and to pay interest.

**Derivatives:** Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

**Hedging:** A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in higher-quality debt securities of corporations located in or doing significant business in the UK. Such securities have historically proven to present some stability over time and have benefited from a limited exposure to interest rates and movements in the bond market. As a result, the performance of the Fund can fluctuate moderately over time.

#### Risks materially relevant not adequately captured by the indicator:

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

**Derivatives risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.
