

## Franklin Global Growth Fund

**Class W (acc) USD • ISIN LU2114348480** • A sub-fund of Franklin Templeton Investment Funds  
The management company is Franklin Templeton International Services S.à r.l.

### Objectives and Investment Policy

Franklin Global Growth Fund (the “Fund”) aims to increase the value of its investments over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity and equity-related securities issued by companies of any size (generally in companies with a market capitalisation around or greater than \$US2 billion) located in any country, including in developed and emerging markets

The Fund can invest to a lesser extent in:

- units of other mutual funds (limited to 10% of assets)
- derivatives for hedging and investment purposes

The investment team employs a disciplined, bottom-up investment approach to identify attractive investment opportunities that have higher expected revenue and earnings growth than their peers. The Fund’s exposure to various industries, regions and markets may vary from time to time according to the investment team’s opinion of the prevailing conditions and prospects for these markets.

The benchmark of the Fund is the Linked MSCI World Index-NR. The benchmark is used solely as a reference for Investors to compare against the

Fund’s performance, and the benchmark is neither used as a constraint on how the Fund’s portfolio is to be constructed nor set as a target for the Fund’s performance to beat. The Fund can deviate from the benchmark.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund’s investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

#### Terms to Understand

**Derivatives:** Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

**Emerging markets:** Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

**Equity securities:** Securities that represent an ownership stake in a company.

**Frontier markets:** Typically, countries whose economies and securities markets are smaller, less accessible and/or at a very early stage of development even compared to emerging markets.

**Hedging:** A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in equity and equity-related securities of companies around the world, including emerging markets. Such securities have historically

been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

**Chinese Market risk:** In addition to typical risks linked to Emerging Markets, investments in China are subject to economic, political, tax and operational risks specific to the Chinese Market. Please also refer to the prospectus for China QFII risk, Bond Connect risk and Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
