Past performance is not an indicator or a guarantee of future performance. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details provided are in share class currency, include the reinvested dividends gross of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Portfolio Data Derivatives Disclosures

Asset Allocation figures shown reflect certain derivatives held in the portfolio (or their underlying reference assets) and may not total 100% or may be negative due to rounding, use of derivatives, unsettled trades or other factors. Fund Measures figures shown for Average Duration, Average Weighted Maturity and Yield to Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Composition of Fund - Geographic, Currency and Duration portfolio weights reflect certain derivatives held in the portfolio (or their underlying reference assets) and may not total 100% or may be negative due to rounding, use of derivatives, unsettled trades or other factors. Duration Contribution by Currency statistics reflect certain derivatives held in the portfolio (or their underlying reference assets).

What are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments.

The Fund invests mainly in debt securities issued by government or government-related entities in any country and in derivatives. Such securities and derivatives have historically been subject to price movements, generally due to interest rates, foreign exchange rates or movements in the bond market. As a result, the performance of the Fund can fluctuate over time.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

Other significant risks include: credit risk, currency risk, derivatives risk, liquidity risk, emerging markets risk.

For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Important Information

This document is intended to be of general interest only and does not constitute legal or tax advice nor is it an offer for shares or invitation to apply for shares of the Franklin Templeton Investment Funds SICAV (the Fund). Nothing in this document should be construed as investment advice. Subscriptions to shares of the Fund can only be made on the basis of the current prospectus and where available, the relevant Key Investor Information Document, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. No shares of the Fund may be directly or indirectly offered or sold to residents of the United States of America. Shares of the Fund are not available for distribution in all jurisdictions and prospective investors should confirm availability with their local Franklin Templeton Investments representative before making any plans to invest. References to particular industries, sectors or companies are for general information and are not necessarily indicative of a Fund's holding at any one time. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. All or most of the protections provided by the UK Regulatory System will not apply to Franklin Templeton Investment Funds (SICAV) Investors. An investment in the Fund entails risks which are described in the Fund's prospectus and where available, the relevant Key Investor Information Document.

Source for data and information provided by Franklin Templeton Investments, as of the date of this document, unless otherwise noted. Benchmark related data provided by FactSet, as of the date of this document, unless otherwise noted. References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. An index is unmanaged and one cannot invest directly in an index. The performance of the index does not include the deduction of expenses and does not represent the performance of any Franklin Templeton fund.

The fund charges all or part of its management fees to Capital. This could lead to a higher level of income but may constrain capital growth.

In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks that may increase the risk profile of the fund and are more fully described in the Fund's prospectus.

Fund Overview: The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market unit price of the fund as at the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions.

For Professional Client Use Only. Not for distribution to Retail Client.**Important Information (continued)**

Ratings: © Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Ongoing Charges: The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Composition of Fund: Quality ratings shown are assigned by one or more Nationally Recognized Statistical Rating Organizations ("NRSRO"), such as Standard & Poor's, Moody's and Fitch. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When ratings from all three agencies are available, the middle rating is used; when two are available, the lowest rating is used; and when only one is available, that rating is used. Foreign government bonds without a specific rating are assigned the country rating provided by an NRSRO, if available. The NR category consists of rateable securities that have not been rated by an NRSRO. The N/A category consists of nonrateable securities (e.g., equities). Cash includes equivalents, which may be rated. Derivatives are excluded from this breakdown.

Performance attribution is calculated in the base currency of the fund.

For a free copy of the latest prospectus, the relevant Key Investor Information Document, the annual report and semi-annual report, if published thereafter or for more information about any Franklin Templeton Investments' fund, UK investors should contact: Franklin Templeton Investments, Telephone: 0800 305 306, Email: enquiries@franklintempleton.co.uk or write to us at the address below.
